Education

B.Tech in Computer Science (AI & ML)

Dronacharya College of Engineering, Gurugram University

2023 – Present

CGPA: 8.5 / 10

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Artificial Intelligence, Operating Systems, Database Management Systems, Cloud Computing, Computer Architecture, Probability & Statistics, Linear Algebra

Experience

Software Developer Intern | Wagen Meters Pvt. Ltd.

Remote | Jun 2025 – Jul 2025

- Developed a FastAPI + React.js real-time dashboard monitoring **10+ industrial machines** across **3 production lines**, consolidating all sensor feeds into a single interface and eliminating manual operator checks.
- Trained an Isolation Forest model on **5,000+ time-series sensor records** across **8 sensor channels**; achieved **82% accuracy** detecting failure patterns, reducing unplanned breakdown incidents by ~35%.

Projects

Real-Time Monitoring System – Jute Ribboner Machine

SIH 2025 Finalist

- Built a web dashboard consolidating **12+ live sensor streams**, machine control states, and error logs in a single view; real-time alerts cut average failure response time by ~40%.
- Trained a classification model on pressure and vibration data achieving ~87% **prediction accuracy** on machine jams, enabling preventive intervention before breakdown.
- Deployed a multilingual UI in **6 Indian languages** so non-English-speaking floor operators across jute-producing states can use the system independently, covering an estimated **200+ operator base**.

College Resource Platform & CGPA Calculator

GitHub

- Shipped a centralized academic platform adopted by **3,000+ students** across **5 departments**; structured content organization cut resource retrieval time by ~30%.

AuditFlow: Audit Analytics Data Pipeline

GitHub

- Scraped and processed **50,000+ NREGA records** across **15+ districts** end-to-end – cleaning, validation, feature engineering, and anomaly detection – surfacing utilization-rate gaps and risk flags with **94% data completeness**.
- Exposed insights via a Flask REST API with **3-tier role-based access** and a Plotly Dash dashboard; backed by PostgreSQL with AWS S3, achieving **99%+ uptime** for fault-tolerant data handling.

CheckoutIQ: Transaction Reliability & Funnel Analytics

GitHub

- Identified ~**0.89% revenue leakage** across **100,000+ transactions** through funnel analysis and surfaced **3 high-risk payment methods** driving disproportionate failure rates.
- Built time-based cancellation spike detection and simulated **A/B tests across 4 checkout flow variants**, generating prioritized recommendations that projected a **12% drop in cart abandonment**.

Skills

Languages: Python, C++, SQL, HTML

Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, OpenCV, BeautifulSoup4, Selenium

Frameworks: FastAPI, Flask, Streamlit, React.js, Plotly Dash

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Dev Tools: AWS S3, Git, GitHub, VS Code, Jupyter Notebook, Google Colab

ML & Analytics: Machine Learning, Deep Learning, NLP, Prompt Engineering, EDA, Feature Engineering, A/B Testing, Hypothesis Testing, Statistical Analysis, Anomaly Detection

Certifications & Achievements

- AIR 19 – NCAT 2025
- Yukti – 2025 selected
- AI Agents Intensive – Google (Kaggle)
- Intro to ML, Computer Networks, Java – NPTEL
- C Training – IIT Bombay
- Databricks Academy – Data Engineering, AI Fundamentals, SQL Analytics
- DSA – Infosys Springboard
